Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ferri.

Ferri discloses a flexible, inelastic strap having a first end, and a second end, and having a fixed loop formed at the first end (34), a connector assembly comprising a movable member (27), a fixed member (70) that is attached to the second end of the assembly comprising: member configured for positioning along the strap, wherein the connector has a connected configuration wherein the movable member and the fixed member are releasably connected, thereby forming a second loop (80) proximate the second end of the strap, and a disconnected configuration wherein the movable member and the fixed member are not connected (fig. 1B).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ferri.

Art Unit: 3764

The dimensions of claims 2-8 are obvious design choices and are within the scope of Ferri.

Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ferri in view of Weingand.

Ferri does not disclose instructions with the stretching device.

Weingand discloses instructions incorporated with a stretching device (abstract).

It would have been obvious to include instructions with Ferri's stretching device, as it is well known in the art, as taught by Weingand, to include instructions for assisting the user's with the device.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lawrence discloses an abdominal exercise device.

Nagatomo discloses a limb positioning device.

Sheeler discloses an exercise strap device.
